Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 July 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

It is first noted that claim 32 has been grouped with the elected claims.

Applicant's election with traverse of Group III in Paper No. 5 is acknowledged. The traversal is on the ground(s) that Groups I and III are actually classified together and there is no burden on the examiner to examine both Groups. This is not found persuasive because while they may be classified in the same subclass, their subject matter would require a diverging search. The two Groups are proper subcombinations each having its own purpose

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-18,23-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Allowable Subject Matter

Claims 19-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification. For example, page 9, lines 5-6 are confusing and should be rewritten.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19-22,32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. While applicants are entitled to be their own lexicographers, the use of the term 'hammers' to represent a support member is contrary to the known use of hammer in the art. A hammer is typically a shredding member in itself and not a support member; clarification is required.

Claims 19-22,32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 19 concerns itself with the knives having overlapping paths of travel, with no spacers being used. This embodiment is shown in figure 25 of this application. Claim 20 includes the use of spacers. Spacers are found in the figure 1 embodiment in that the knives overlap the spacers but do not overlap adjacent knives. Thus, it is not clear how claim 20 can depend on claim 19 when they represent two different embodiments. Clarification is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brewer. Brewer in figure 4 shows a rotor assembly with knives that overlap their supports. Brewer does not use spacers. However, the use of spacers is well known in the art to properly locate the knife supports. In order to properly locate knife supports, it would have been obvious for one skilled in the art at the time of the invention to modify Brewer by providing spacers between the knife supports, since the use of spacers is well known in the art and of no patentable merit.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
